Author:	<i>Seline van der Wat</i>
Effective date:	<i>2018-03-15</i>
Approved:	<i>Nic Klopper</i>

Position: Web developer

Department: Back-End Development

Work location: Ashlea Gardens, Pretoria, South Africa

Supervisor/Manager: Lead Back-End Developer

Company Description:

hearX Group is an innovative start-up providing smart solutions for healthy hearing. Our low-cost mHealth solutions provide user-friendly interfaces to clinically valid tests, with cloud-based data management and integrated referral systems linking patients to healthcare services. hearX Group’s vision is to impact the 1.2 billion people globally who suffer hearing difficulties, through affordable access to screening or testing solutions and linkage to hearing health.

Our award-winning products are used in over 25 countries. Our aim is to impact on an individual, community and global level by creating sustainable, smart solutions for hearing health for everyone

Main duties and responsibilities:

hearX is looking for an enthusiastic, well-versed web developer to join our team to build and maintain our suite of websites

- Translate UI & UX designs into HTML, CSS and Javascript websites, with a focus on user experience and usability
- Integrate websites with services such as MailChimp, Agile, mail services etc
- Attend team meetings and report back on progress
- Continuously improve existing websites
- Ensure best practice is used in the implementation of websites
- Provide input from concept, through design, to implementation phases of websites
- Take lead from the expertise of the team lead in terms of code writing style, commenting and release notes
- Meet timescales as required by team lead and assist in setting of website development timelines

JOB DESCRIPTION

RES-JD-01
v1.1

- Work with the marketing, design, sales and project departments to ensure websites translate accurate and required information
- Maintain website release note schedule and update team on progress, delays and changes made
