SELF TEST HEARING SUITE

A tablet-based hearing test solution for diagnostic assessments outside a sound booth. The solution allows for self-testing counter-side, curb-side or at home with telehealth support. It even allows healthcare professionals to make treatment recommendations, including the fitment of hearing aids that can be provided in low- or no-touch alternative models of care.

The hearX Self Test Kit software includes access to:

- hearTest: Pure tone audiometer
- hearSpeech: Speech-in-noise which includes UCL/MCL test
- hearRisk: Ear risk assessment
- hearScope: Digital eardrum otoscopy
(If the hearScope hardware is purchased).

hearX Self Test Kit is launched from mHealth Studio, which is our integrated cloud-based electronic health record solution to manage your patient, facility and test data seamlessly. mHealth Studio is free of charge purchased with the hearX Self Test Kit solution.

SELF TEST SOLUTION

DIGITAL AI OTOSCOPE

A digital video otoscope that captures high-quality images and videos from a smartphone or desktop and includes the world's first AI image classification feature to assist healthcare providers by accurately classifying images of the eardrum.

hearScope is shipped in a hard cover carry case and comes standard with a phone stand, as well as 6 specula (2 x 3mm, 2 x 4mm and 2 x 5mm).

hearScope can be used as a standalone application. When used in conjunction with the hearTest, hearTest Occ Health or hearX Self Test Kit the hearScope application is launched from mHealth Studio Cloud, which is our integrated cloud-based electronic health record solution to manage your patient, facility and test data seamlessly. mHealth Studio is free of charge purchased with hearScope.

CLINICAL TEST

ONLINE HEARING TEST

A simple and affordable way for a website owner to connect with people concerned about their hearing.

Using breakthrough, clinically valid, speech-in-noise technology, the online test generates qualified referrals for hearing aid sales. The hearDigits widget is customizable to easily and seamlessly be embedded on a healthcare professional's website. End-users can take a free 2-minute hearing screening, order hearing aids from the website, or submit their details for secure referrals directly to the healthcare professional, via a secure online portal.

	Premium
Direct referrals and test monitoring in cloud-based Leads portal.	✓
Themes Toggle between a light and a dark version of the widget. Referrals can be turned on/off.	✓
Logo Determine whether you would like the hearDigits logo to appear on your widget. Select the images and icons custom to your preference, to best suit your widget.	✓
Fonts Select between 7 different font types available for the hearDigits widget.	✓
Colour Customize your widget in terms of colour, according to the clinic's look & feel.	✓
Text Edit and change the text presented on several windows of the widget.	✓
Privacy Policy Add your own privacy policy. Select your own image to be displayed with your contact details. Basic patient information can be captured before the result screen is displayed. The result screen can be customized with regards to image upload and button flow. The user has the ability to add a hyperlink post test to redirect to a specific URL.	✓
